

Casino Niagara Master Plan Niagara Falls, Ontario

CLIENT: Ontario Lottery and Gaming Corporation (OLGC)

Planning

synectics
SAFETY SPECIALISTS

The City of Niagara Falls relies heavily on the tourist industry. Competition for the tourist dollar remains difficult with the ever evolving landscape and growing number of attractions. The Ontario Lottery & Gaming Association (OLGC) wishes to draw more tourists to their Casino Niagara site through the integration of existing attractions through site planning.

Synectics was asked to participate in the planning process by providing input regarding the safe and efficient movement of pedestrians and vehicles in and around the planning site. The master plan includes new vehicular access points, landscaping, signage and specially constructed features that all required a transportation assessment regarding how each will affect current and future traffic operations and levels of service on the adjacent streets and intersections.
